Index to volume 4 (1992)

Subject index

A
active badge location systems 343
advanced manufacturing technology 200
animated demonstrations 3
automata 83

B
binary relational databases 147
branching selection 68
browsing 147

C
centralised architectures for groupware 364
collaborative drawing tools 364
collaborative user interfaces 41
colour coding scales 179
computer systems in the workplace 343
computerized testing 163
computer-generated displays 179
computer-supported co-operative work 41, 314, 317, 343, 364
context support 41
criteria for workspace sharing 364
cyberspace 147

D
dataflow diagrams 102
data-centred view of systems development 246
de-skilling as a result of new technology 200
device independence 246
dialogue with information system 218
dialogues 83
digit span recall 163
display elements 231
displays' visual properties 231

E
entity-relationship model 102
exploratory learning 3

F
Fitts' Law 291
flat panel displays 231
formal methods 317
formal models 83

G
gaps between characters on display 231
global undo 317
graphics editors 3
group drawing 364
group editor 317
groupware 364

H
HyperCard 41

I
incremental matching 68
industrial conflict 200
information system 218
instruction on computer use 3
interaction errors 23
interactive systems 83
interfaces 23, 41, 68, 83, 209, 231, 267, 291
interfaces (graphical) 147
introducing new technology to the workplace 200

J
job design 200

L
local undo 317

M
menu design 83
Model Human Processor 291
multiple cursors 364
multi-user computer systems 314, 317, 364
multi-user undo 317

N
natural language processing 218

R
real-time remote conferencing 364
recovery 23
recovery procedures 317
redo 23
replicated architectures for groupware 364
requirements specification 102, 124, 246

S
screen editor 68
shared workspace 364
sociological impact of location information systems 343
software engineering for interactive systems 102
software functionality 209
spreadsheet use 267
suggestions for word completion 68
system design 102, 124, 246, 267
systems analysis 102, 124

T
task analysis 102, 124, 246, 267
task representation 267
telepresence 364
text-editing 291
text-pointing and -dragging 291

U
undo 23, 317
usability 209
utility of systems 209

V
visualisation 147

W
workplace attitudes to new technology 200, 343

Title index

Animated demonstrations for exploratory learners 3
Branching selection of suggestions 68
Combining CSCW and user support techniques to design collaborative user interfaces 41
Computer support for co-operative work 314
Computer-based methodology for improving system design 267
Display elements and gaps: a comparison of flat panel display characteristics 231
Field testing a natural language information system: usage characteristics and users' comments 218
Formal interactive menu design 83
Further investigations into the use of colour coding scales 179
Giving undo attention 317
How should Fitts' Law be applied to human-computer interaction? 289
Human and technical factors of distributed group drawing tools 364
Locating systems at work: implications for the development of active badge applications 343
Microcomputer version of a digit span test in clinical use 163
Motivation, practice and guidelines for 'undoing' 23
Shopfloor attitudes towards advanced manufacturing technology: the changing focus of industrial conflict 200
Task analysis and system design: the discipline of data 246
Task analysis and systems analysis for software development 124
The role of task analysis in systems design 102
TripleSpace: an experiment in a 3D graphical interface to a binary relational database 147
Utility and usability: research issues and development contexts 209

Author index

Abowd, G D and Dix, A J Giving undo attention 317
Adam, S see Gillan, D J
Addison, M see Diaper, D
Beaumont, J G see French, C C
Benyon, D Task analysis and system design: the discipline of data 246
Benyon, D The role of task analysis in systems design 102
Besuijen, J see Spenkelink, G P J
Bohnet, R see Greenberg, S
Chesworth, L see Payne, S J
Cohen, M see Payne, D
Davids, K and Martin, R Shopfloor attitudes towards advanced manufacturing technology: the changing focus of industrial conflict 200
Diaper, D and Addison, M Task analysis and systems analysis for software development 124
Dix, A J see Abowd, G D
Flavell, R and Heath, A Further investigations into the use of colour coding scales 179
French, C C and Beaumont, J G Microcomputer version of a digit span test in clinical use 163
Gillan, D J, Holden, K, Adam, S, Rudisill and Magee, L How should Fitts' Law be applied to human–computer interaction? 289
Greenberg, S, Roseman, M, Webster, D and Bohnet, R Human and technical factors of distributed group drawing tools 364
Grudin, J Utility and usability: research issues and development contexts 209
Harper, R H R, Lamming, M G and Newman, W M Locating systems at work: implications for the development of active badge applications 343
Heath, A see Flavell, R
Hellman, R Combining CSCW and user support techniques to design collaborative user interfaces 41
Holden, K see Gillan, D J
Lamming, M G see Harper, R H R
Lougher, R see Mariani, J A
Magee, L see Gillan, D J
Makowsky, J see Ukelson, J
Mariani, J A and Lougher, R TripleSpace: an experiment in a 3D graphical interface to a binary relational database 147
Martin, R see Davids, K
Murray, D see Rodden, T
Newman, W M see Harper, R H R
Pastore, R see Payne, D
Patrick, A S and Whalen, T E Field testing a natural language information system: usage characteristics and users' comments 218
Payne, D, Cohen, M and Pastore, R Computer-based methodology for improving system design 267
Payne, S J, Chesworth, L and Hill, E Animated demonstrations for exploratory learners 3
Rodden, T and Murray, D Computer support for co-operative work (Editorial) 314
Roseman, M see Greenberg, S
Rudisill, M see Gillan, D J
Spenkelink, G P J and Besuijen, J Display elements and gaps: a comparison of flat panel display characteristics 231
Ukelson, J and Makowsky, J Formal interactive menu design 83
Verrips, J Branching selection of suggestions 68
Webster, D see Greenberg, S
Whalen, T E see Patrick, A S
Yang, Y Motivation, practice and guidelines for 'undoing' 23
